

For any use.  
For any environment.

**Technical characteristics**

- Gas springs ..... 5–10.000 N
- Tension springs..... 30–5.000 N
- Locking gas springs..... 0–2.500 N
- Dampers..... 5–2.500 N
- Double-stroke gas springs ..... 150–5.000 N
- Telescopic gas springs..... 100–1.000 N
- Customized solutions according to customers' requirements

End Fittings, Mounting Brackets, Accessories

Also available in steel and stainless steel  
AISI 303/304; AISI 316L/316Ti

Temperature range ..... -40°–+200°C

**Certifications**

DIN ISO 9001  
according to RoHS

High-Tech made in Germany

**German engineering**, a high in-house production depth and a focus on customer specific solutions make **HAHN Gasfedern** an internationally renowned manufacturer of high quality machine components.

Founded in the Swabian region of Germany 50 years ago, the company quickly gained its reputation as a **pioneer of gas spring technology** as well as a **trendsetter for innovative solutions**.

Optimum solutions to specific requirements are developed in close cooperation with the customers. For this the company relies on a **wide range of gas spring products** readily available for delivery. **Individual and custom made products** from **steel and stainless steel** (AISI 303/304 und AISI 316L/316Ti) can be realized within a short time span through our highly modern production facilities.

**Delivery reliability**, high **technological competence** and distinct **flexibility** are further qualities which all HAHN Gasfedern customers value.

HAHN Gasfedern sets itself the highest standards. Each product is developed, produced and delivered under the **strictest principals of quality**. Specially trained personnel therefore meticulously monitor every phase of the production process. HAHN Gasfedern is certified according to DIN EN ISO 9001.

Those strict quality standards are also applied in the choice of **international sales and service partners**.
