DOOR STOP

Secure locking and holding open of caravan doors and side flaps.

- Locks in various positions
- Can be locked in open and closed positions
- Reliably holds doors and side flaps

USE

The HAHN door stop helps you to keep lightweight caravan doors and side flaps open. Whether in wind or on an incline, the door stop prevents doors and flaps from shutting, reliably holding them open and helping the safe loading and unloading of the vehicle. With the kit system, you can set individual specifications for your HAHN door stop, defining the angle of opening as you desire.

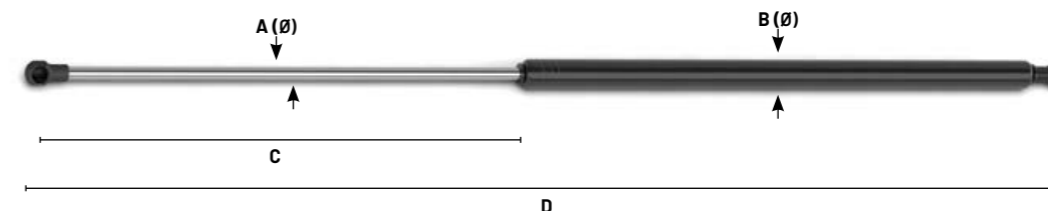

We will be happy to help you with designing your door stop so that it holds your door securely open at the intended position.

FUNCTION

With the HAHN door stop, you can lock lightweight caravan doors and side flaps shut or open.

AREAS OF APPLICATION

- Caravan and motor home doors
- Light side doors
- Garage doors of motor homes
